

## Lead Rack Hire Guidelines

- Lead racks may only be hired out to members who have completed a lead course. A list of approved members may be found here  
<https://docs.google.com/spreadsheet/ccc?key=0AhA2rlwGkHkMdElzbc1UclViR2FuRzBadkNjNlloY1E&pli=1#gid=0>
- If you hire a rack **YOU** are responsible for it. Check the rack **BEFORE** leaving the gear room and **BEFORE** returning. If there is any missing gear please notify as soon as possible
  - Michael Salt, Phone: 0497 090 903, email: [michaelsalt@hotmail.com](mailto:michaelsalt@hotmail.com)
  - Victor Macko, Phone: 0430 122 302, email: [victor@victor.com.au](mailto:victor@victor.com.au)
- If there is missing gear **DO NOT** take gear off another rack. This causes no end of problems later down the line. Contact Victor or Michael for a possible solution.
- Sometimes as a trip leader it is more practical to collect all racks needed for members on a trip. If this is done it is advised to hire out the racks in the other members names. **PRIOR PERMISSION** is required from that member before the trip leader does this. Remember, whoever has the gear hired out (in their name) is fully responsible for it.

## Standard Lead Rack Equipment List

- Coloured Snapgates are to be used with camming devices
- Screwgate quantity includes screwgates attached used for belay devices
- Always count each item individually. For example an extender will consist of one sling, one straightgate biner, and one bentgate biner.
- Bentgate biners are used for the rope side of an extender. The straightgate is used for the protection side.
- All lead racks are colour coded with a tag on each item. Ensure that 'colours' do not get mixed.
- Whilst nearly all items on a lead rack are standardised throughout the club there may be variation in the cams and nuts used. Whichever brand of camming device is used (Black Diamond, Wild Country), it will be as a full set and not a mix of different brands of cams. The same also applies for micro nuts.
- All gear on a standard lead rack should be rated to a minimum of 7 kN. However this does not apply to micro nuts (RP's and Wild Country Micro Rocks) **OR** hexes where the Spectra sling has been replaced with 6mm or 7mm cord. The load ratings for such items may be substantially lower.

Type	Brand	Description	Quantity
Belay Device	Any	Must be similar to ATC guide	2
Bolt plate	any		5
Cam	Black Diamond	C4's. SIZES: 0.3, 0.4, 0.5, 0.75, 1, 2, 3	7
	<b>OR</b> Wild Country	Helium Friends. SIZES 0, 0.5, 1, 1.5, 2, 2.5, 3, 3.5, 4	9
Cordelette	Any	4 metres	2
Gear Sling	Any		1
Hex	Wild Country	Rockcentric. SIZES: 3- 9	7
	<b>OR</b> DMM	DMM Torque Nuts, SIZES: 1-4	4
Nut tool	Wild Country	On elastic key chain	2
Nuts	DMM	Walnuts. Sizes: 1- 11	11
Nuts	Wild Country	Rocks. Sizes: 1- 10	10
Nuts	RP	RPs size 2-5 (Four)	4
	<b>OR</b> Wild Country	Wild Country Mini rocks (2 of 0.75, 2 of 0.5: Four total)	4
Prussik	Any		6
Quickdraws	Any	All same size (either 12cm or 18cm)	12
Screwgates	Any		10
Slings	Any	Spectra 120cm	6
Slings	Any	Spectra 60cm	6
Snapgate	Any	Bentgate for extenders	8
Snapgate	Any	Straight gate: For nuts, hexes, bolt plates, cordelettes, and Extenders	14
Snapgate	Black Diamond	Neutrino wire gate colour to match Cams	7
